**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 12-14, drawn to a fabric-elastomer sandwich, classified in class 442, subclass 59+.

~~II. Claims 1-10 drawn to method for producing a fabric-elastomer sandwich,~~  
classified in class, 264 subclass 257 .

2. The inventions are distinct, each from the other because:

The inventions of Group I and Group II are related as the product and process for making and are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The product of Group I as claimed can be made by another materially different method such as evenly impregnating the fabric discontinuously with the elastomer and then applying over the fabric surface to produce regions of varying dimensions and shapes.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1771

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the reply to this requirement to complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
